Important before assessing damage:

Not all records in the report indicate an actual consequence of damage or a traffic accident.

Some records may appear not due to the damage itself, but as a result of damage assessments, residual value calculations, insurance company processes, costly repair works, inspections, diagnostics, pre-sale evaluations, or other formal procedures.

### About this record:

*This record lacks detailed information to accurately identify its origin, but we provide all available data for your analysis. It is important to understand that this is a recorded financial assessment, which may indicate:*

- **Repairs or modifications:** a service estimate for planned maintenance, cosmetic bodywork, or the installation of additional equipment (e.g., rims);
- **Proportional value:** the cost of parts for new or luxury vehicles is high, so even minor repairs can appear as a significant amount;
- **Damage record:** a calculation performed by an insurance company after a potential traffic accident.

*We provide this information as an additional indicator to help buyers and sellers constructively discuss the vehicle's history and carry out a more focused physical inspection at a service center.*
